1. The number 1023 was filmed in the village of Arab al-Shanabla.
2. A total of 846 letters were implemented in the village of Arab Al-Shanabla.
3. A total of 380 children were enrolled in the Friendship Management Program in the village of Arab Al-Atiyat and Shaklil village.

Continuity Plan

Financial Continuity:

A fee of LE 20 is paid for each child enrolled in kindergartens to ensure that the salaries of the teachers and the materials of the activities of the halls are frozen (these amounts are frozen in a separate account until the end of the grant and the exchange begins.

- Activities that have not been collected for the company's own revenues are supported.

The association's ability to value and sources of revenues of the association as shown in the association's revenues and sources is shown.

- The association has special cars that can be used after the end of the grant to follow up the various activities.

- The Assembly has fixed premises and furniture to allow the continuation of the activity

Institutional continuity

The Assembly has a guide to financial and technical policies and procedures

- The final accounts of the Association are carried out by the system of accounting disclosure

- The Association has a trained team in all fields

- The Association has a consultative center for NGOs that provides training and advisory services, technical assistance, writing proposals and organizing conferences, in addition to conducting an institutional evaluation of associations and developing a capacity building plan.

- The Association has experience in working with NGOs in partnerships and the number of associations that participated in the implementation of activities to 92 societies.

- The General Assembly in many networks (Community Based Rehabilitation Network - Education for All Network - AIDS Network - Women's Rights Support Network - Child Protection Network)

- The goals of the Association are specific and clear

- The Society operates at the level of the Republic

- The Society has an independent volunteer management

- A board of directors of diverse powers of expertise available for free participation in the absence of differences between its members -

- There is a separation of powers between executive management and the board of directors

- Meetings of the General Assembly shall take place on their original dates

Technical Continuity:

The existence of an institutional structure and organizational structure of the society, where the society has strong effective management and good internal governance:

- Highly skilled staff.
- Decentralized in making quick decisions.
- The existence of integrated internal systems and policies.
- Board of Directors is strong and free from disputes.
- The experience of the association in the refinement of such projects.
- The presence of an administration of volunteers in the association, which makes it able to continue implementation.

Community continuity:

The project is based on encouraging community participation

- The existence of a consultative committee on the project makes a continuous relationship between the Assembly and decision makers, which facilitated the continuation of overcoming the obstacles facing the project.
- Beneficiaries are aware of the available government services and the procedures for obtaining them, knowing the beneficiaries of their rights and demanding them.
- Dependence on activating the role of positive models and peer education helps to continue to spread awareness in different fields
- Involvement of government cadres in aspects of project activities is one of the factors of political support.
- Signing protocols of cooperation between all governmental and non-governmental bodies concerned with different sections of the project.
- The presence of the association clearly in these villages, such as the presence of about 30 community schools, which is one of the most important projects of the association in the village of Maabda makes it easy to follow the various activities of the project

Recommendations and future proposals

1. Activating the educational management of extra-curricular activities between schools
2. Giving the librarians strong powers to choose books and references that serve the curriculum
3. Attention to talented students at the level of management and administration
4. Add topics about healthy nutrition and growth requirements in different stages of growth (early childhood messages)
5. Follow up the health of kindergartens periodically.
6. Provision of funds from the budget for the seats (3 kindergartens) based on the evaluation of the Licensing Committee for licensing during the next year.
7. Continuation of the work of the protection committees in the villages to reach vulnerable children within the community.
8. Develop a plan of interventions to solve the problems of children observed by the protection committees

Challenges ...

1. The absence of a protocol between the Authority and the partner associations and directorates determines the role of each partner, which led to the reluctance of the teachers to attend the exercises only through formal communication to the Directorate of Education, which was overcome through the work of official correspondence to the Directorate in the implementation of each training.
2. Non-commitment of partner associations to inform committee members of training dates

Community Schools Project:

The Community Schools project is designed to provide education services to children who have dropped out of education in the unmarried and far away from elementary schools. The Community School is a one-semester school with male and female students aged between 14 and 6 years old.

The local community provides the necessary space for the implementation of the project and oversees a committee of the village's popular leaders called the village affairs committee to remove the obstacles that impede the progress of the study, especially at the level of customs and traditions and living conditions difficult for students enrolled. The project directly targets children and their parents

The overall goal.

The community schools project aims to increase the educational opportunities for children who drop out of education. The method of education in these schools depends on the method of self-learning.

The Association for Childhood and Development in Assiut, in collaboration with the Social Fund for Development, opened 150 community schools through the multi-purpose development project. The schools were selected to be in Najwa and Azab deprived of educational services in five centers (2 centers were added later) Assiut and it (Dirof - Fath - Abnob - Sahel - Badari + Ghanayem - Qusiya has been opened on three stages, including:

first stage	the total number of enrolled 3061 children	including 2411 females	including 604 males
-------------	--	------------------------	---------------------

second stage	total number of enrolled 2895 children	including 1937 females	including 876 males
third stage	the total number of enrolled 4185 children	including 2721 females	including 1464 males
current stage	total number of enrolled 4500 children	including 2380 females	including 2120 males

The number of schools opened was 600, of which 1,4741 graduated.

Support from the Social Fund for Development until 2005 and from 2005 to 2007 was funded by the Ministry of International Cooperation and from 2007 to date, the Association supports the schools and provides the necessary needs both in technical aspects, supervision, follow-up, material aspects, equipment and provision of tools required for children and schools.

Impact of community schools....

The impact on pupils ...

- Availability of health care for students as a result of their inclusion in the beneficiaries with health insurance.
- Increased desire of students to complete their education.
- Giving pupils through community schools positive qualities and behaviors.

Impact on society ...

- The opening of community schools in villages contributed to some extent to the decline in illiteracy.
- Village affairs committees led to the development of the village through its members.

The impact on parents ...

- Getting parents into community schools has changed their perceptions of their children's education.

Parents' desire to educate their daughters.

- Participation of parents in solving the problems of their children.
- Provide parents with life skills and healthy and social cultures through the program of parental awareness.

The impact on the society ...

- Availability of a team with expertise to ensure continuity of the project.
- The Association has experience in working with community education projects with other institutions and institutions.
- Building a bridge of relations and interdependence with education and educational departments.

- The primary objective of the community schools is to increase the educational opportunities for children who drop out of education. The method of education in these schools depends on the method of self-learning.

Targets ...

- Direct: Children who drop out of school and are promised 4,500 children (males 2120) - (females 2380).
- 300 community workers.
- Non-direct: the people of the village

Geographic scope ...

The project works in 7 centers in Assiut Governorate (El Fath - Abnoub - Sahel - Badari - Ghanayem - Dairout - Qusiya).

Partners ...

The important role of the participation of the auxiliary bodies in the community school, including the Directorate of Education, plays a positive role in the provision of textbooks - teachers salaries

health insurance..

The Health Insurance Authority welcomed the inclusion of children in community schools for its services due to the poor economic level of families

World Food Program

Where it provides food for all students of community schools (rice - biscuits) provided that the percentage of attendance of the student at the school for 80% during the month under the slogan "Education for food"

Activities implemented ...

Technical and field follow-up

Follow-up of schools once a month as planned to provide technical support to schools through the team trained in the management of community schools active learning methodology and writing periodic reports to observe the progress of school students and solve problems in the appropriate time, cost and cost.

- Intensifying follow-up of weak schools
- The number of field follow-up (870) follow-up during the year 2015

Training ..

- Training 160 teachers from all centers on literacy and reading and writing difficulties
- English language curricula for all grades
- Training 20 teachers on a program to discover yourself to improve their job performance

Schools	<p>Supporting schools with school furniture - raw materials</p> <p>Conduct a self-assessment of 150 community schools to identify strengths and weaknesses and develop a plan for improvement</p> <p>Conduct exchange visits of experiences between schools to learn about modern learning methods in active learning</p> <p>Developing the infrastructure of a number of schools</p> <p>Spreading the culture of quality in community schools</p>
Parents	<p>Implementation of the Parental Awareness Program on topics (education, health, disability, life skills, meeting, monthly)</p>
	<p>Implementing meetings with parents of students with learning delays to follow up their children's progress</p>

Difficulties ...

- There are some difficulties that have recently led to the low level of education in schools during the past three years and these difficulties
- The number of teachers in the community schools (appointment - annual leave - leave

leave - transfer for family reunion - child care) is limited. The number of teachers in the school is 35, and this results in poor performance.

- Non-availability of textbooks in English language - religious education.
- Lack of a standardized evaluation form for evaluating the performance quality of teachers in schools by the supervisors of educational administrations.
- Lack of financial support for the project, which affects the efficiency of the educational process.

Achievements ...

- Despite all the difficulties that still exist so far, the Assembly was able to achieve achievements in the support and continuity of community schools, including:
 - Continued funding and renovation of community schools for a fourth consecutive year to accommodate new children who drop out of education.
 - Implementation of the initiative to rehabilitate 15 community schools in Abnoub Center for Accreditation and Quality through cooperation with Save the Children within the project of community participation to improve the state of health, education and early childhood implemented by the Society
 - Completion of the education of (4500) students of children who drop out of education in the primary stage

Disability Unit

Since its inception, the Society has taken care of, rehabilitate and integrate disabled people into their societies and has implemented this in several stages, serving its objectives and mission towards the marginalized and their causes, with clear policy and concrete steps to achieve the following:

Rehabilitation and social integration of the disabled

Raising awareness of the issues and rights of the disabled

Providing service and care without discrimination and for all types of disabilities

Support and support for the disabled and their families

Environmental rehabilitation of the physically disabled

The overall goal.

Improving the quality of life for 2100 handicapped people and integrating them into the community in the villages and centers of Assiut Governorate.

Targeted (male and female).

- Direct beneficiary: children in the age group 0 to 18 years in all villages of the centers of Assiut Governorate.

- Indirect Beneficiary: Families of disabled persons / disabled persons / over 18 years

- The final beneficiary: the community

Activities implemented ...

Medical Rehabilitation

- The Society provides specialized orthopedic clinics on Tuesday and the neurology on Sunday every week. The number of disabled persons reached 1542. They benefited through the clinics with medical services such as (detection and examination - exchange of compensatory equipment and medicine for surgery - medical reports).

The following is a hesitant statement:

Total recipients of medical services	Detected cases	Confused situations
1542	380	1162

Social Welfare ..

- Social care was the integration of 15 mental disabled persons in education - 250 disabled persons were able to pay the school bills in accordance with the expenditure decision determined only by Guanyin

- Follow-up number of 995 handicapped / homes.

Program from child to child ..

- To integrate children into their communities, 25 disabled children participated in the day of the disabled

- Implementation of 24 group sessions for children in the Childhood Center in the group sessions

Childhood Center for the Rehabilitation and Training of the Disabled and Their Families

- The idea of setting up the center is based on community-based rehabilitation because of its global trend based on the community's development of its resources, its

resources and its main role in rehabilitating persons with disabilities, improving the quality of their lives and creating the appropriate environment for integrating them into all activities of life existing in their local environment.

Beneficiaries ..

The Center receives all kinds of disabilities and those who suffer from learning difficulties and delays

Methodology

- Evaluation of children and guidance of families and awareness of appropriate interventions for children with disabilities
- Setting up special programs for each disabled person according to his disability through individual sessions and his group joining the center's cows to cost the family with household duties that contribute to the implementation of the rehabilitation programs proposed for them
- Provide families with refresher sessions that provide them with new in the field of community-based rehabilitation
- Adopts the center to spread the culture of integration levels

The center has three sections:

Evaluation Section and Measuring Skills

Family guidance

Audiology and Linguistic Rehabilitation Department

- The Center provided community-based rehabilitation services for 60 disabled persons through the implementation of 773 audio training sessions and the development of educational skills for the disabled and 773 sessions to enable families to deal with their children and train them in life skills.

Awareness

In order to raise awareness of the society's goals and objectives towards disability and disability issues, 59 meetings were held for the families of the disabled, Their spread and definition of other places providing service to the disabled and how to obtain them.

Achievements....

Activating the role of the providers to serve the disabled

Continuing to serve disabled people in the centers despite the lack of external funding and reliance on self-financing from the association

A total of 50 disabled orphans benefited from the services of the Egyptian Food Bank

Enabling women to claim inheritance rights project

Since its inception, the association has been active in supporting the rights of women. It has implemented many programs and projects that will interest women, empower them and educate them, whether healthy or social, and even provide psychological and educational support and many other programs and projects.

One of these projects is the Women's Right to Inheritance Project, which is a new road on one of the closed doors in Upper Egypt. The project not only helped women get their rights or awareness but broke their silence in this right.

Partners ...

- CARE International
- Center for Women's Issues
- Childhood and Development Association - Assiut

Egyptian Family House

Geographic range ...

Assiut Governorate

- Association for the development of society in Achilles

Community Development Association in

- Society Development Society in Bani Shukair

Project Mechanisms ...

- Pioneers of Change Committees

- Mediation committees

- Legal support centers

Expected impact of the project.

Women in Upper Egypt have greater access to and control over economic rights, resources and opportunities

Expected outcome of the project ...

The number of 6,000 women in Asyut and Sohag has been enabled to demand, acquire and manage their heritage and property

Project results

- Local institutions (6 community-based organizations) work effectively at the community level, and with intermediate organizations, the level of retention of women's rights to inheritance, property rights, and management of pollution is regulated by legislation and the special conditions of CEDAW

- Local initiatives in 6 communities with multiple stakeholders, including women, and community-based mechanisms to promote women's access to property rights and inheritance.

- 12,000 women will be able to receive their inheritance and property

Project activities ...

- Holding a workshop for the participating associations in the project in Hurghada to develop the annual plan for the project

- Implementation of a meeting of social workers to develop awareness plans for students in schools about the right of women to inherit through student activities

- Implementation of the celebration of student activities in the targeted schools of the project in Manfalut and Abotig centers

- Holding a workshop on gender for members of the boards of directors of the grassroots associations and umbrella society

- Training on how to design and implement door-to-door campaigns for change pioneers

- Holding a workshop on preparing the internal rules of the members of the mediation committees

- Holding training on the interactive theater of change pioneers to prepare cadres trained to carry out awareness raising activities through the theater

- Holding meetings of senior representatives of families in the villages of Bani Shukair, Dwayneh and Al-Nakheela to present the issue of women's right to inheritance

- Hold a monthly meeting of the project team to develop monthly plans and follow up the implementation of the work

- Holding a workshop for media professionals at the level of the Republic on building and strengthening the capacities of media professionals in the field of women's rights and exit the list of the media committee elected at the level of the Republic

- Holding a workshop for change leaders on how to manage agricultural properties and embarking on an action plan to implement this with women who have obtained their inheritance from agricultural lands through awareness classes within their

communities.

- A visit to follow up the activities of the project was carried out by A / Vivan - Director of CAIR Cairo Office and Mr. Mohamed El Naggar - Director of the Women's Right in inheritance project and attended a meeting of the mediation committee and leaders to change and display cases of monitoring and discussion with the members of the committee. A visit to positive models took her legacy and was already able to invest it
- Signing a protocol of cooperation between CARE International and the Egyptian Family House in Assiut and the Childhood and Development Society with a view to activating the role of the mediation committees at the village level and formalizing them to enable women to obtain their legal inheritance
- The 16-day celebration was held to combat violence against women at Assiut University. The celebration included a marathon for cycling and jogging in the campus and prizes for the winners. A seminar on women's rights was held, followed by a director of the governor's office for women's affairs, From civil society organizations in this celebration
- A visit was held to exchange experiences between the Egyptian family house in Sohag and the Egyptian family home in Assiut to benefit from the activities carried out by the family house in Assiut with the presentation of their experiences within the governorate

Project achievements ...

- 2 workshops for women cadres in the target communities of the project to activate the civil participation of civil society as well as the gender and internal governance of civil associations and the exit of a team aware of the importance of civil participation and the law of civil associations can be invested within civil society organizations
- Holding a workshop on the integration of men in gender issues in Hurghada in the governorates of Assiut and Sohag and embarking on social initiatives to be implemented within the target communities of the project.
- A visit was held to exchange experiences of the mediation committees affiliated to the project of women's right to inheritance in Assiut and Sohag governorates and other dispute resolution committees in Cairo governorate to maximize the benefit of existing expertise in solving problems related to violence against women, especially women's inheritance issues.
- Completion of the implementation of door-door campaigns through the pioneers of change in areas that have not been covered before, campaigns have been implemented and the number of beneficiaries of the campaigns reached 3840 women
- raising the awareness of the number of 5807 during the period, including 2620 women and 3187 men in the target communities through awareness seminars on women's right to inheritance from a religious, social and legal perspective through the holding of 95 awareness seminars
- Transfer of knowledge on the issue of women's right to inheritance to 4,757 women in the villages of Al-Nekheila, Dweina and Bani Shakir through home visits and 4000 women in the target communities through knowledge transfer activities. The meeting will be held in cooperation with the women's savings groups implemented through the savings and lending project Use analog viewer view
- The number of 424 cases that you wish to obtain inheritance
- Solving the inheritance problems of 347 women and obtaining their inheritance
- The signing of the number of 2700 people on a document is worth and lamentable

Problems encountered during project implementation ...

- Change in the project staff of the Intermediate Association and choose a new coordinator of the project in the Intermediate Association after the current project coordinator moved to work on another project in the Association
- Delay in the presentation of the issue of advocacy and the official mediation committees, which need a decision of the governor to change the executive leadership, where the appointment of a new governor of Assiut
- Some members of the change leaders in the target communities have changed because they are not present and in accordance with regulations that have been replaced by other grass roots. Pioneers of change also need to use innovative ways to spread awareness and knowledge transfer within communities
- Al-Rayyan Association for Society Development apologizes for delaying implementation of the project because it is unable to fulfill its obligations in carrying out the project activities in the framework of the contractual relationship with the Childhood and Development Society.
- Delay the implementation of some planned activities due to unstable security conditions
- Poor performance of some members of the mediation committees and the need to replace them by the inclusion of new elements effective
- The idea that many women do not have access to legal support offices to solve inheritance problems still prevails despite the refusal of some rights activists to agree to friendly solutions, considering the customs and traditions.
- The resistance of large families to the idea of inheritance of women, where the majority agrees to inherit from smallholders

16,000 line children protection

The Childhood and Development Association, in collaboration with the National Council for Childhood and Motherhood, implemented the Child Helpline Hotline (1600), a free 24-hour line with a trained staff to deal with all kinds of problems and works to solve children's problems from 1 to 18 years of age. Complaints about children at risk and the quality of services provided by the line include:

- Reports on school violence.
- Domestic violence through cooperation with the Ministry of Education.
- Providing health services and psychological counseling through cooperation with the Ministry of Health and the Health Insurance Authority.
- Providing legal references for vision, maintenance, custody, etc.
- Provide material assistance through cooperation with the Ministry of Solidarity after conducting the meeting.
- Providing the necessary and sheltering street children and family disintegration through the care homes of the Ministry of Solidarity.
- Intervening in reports on bullying or security aspects through a team of the Ministry of the Interior.
- Provide counseling and receive reports on FGM.
- Provide service at the level of the Republic through cooperation between the National Council for Childhood and Motherhood and the offices of governors provide services for 29 governorates in addition to the role of civil society "NGOs" through the cooperation of NGOs with the line of assistance.
- Providing counseling assistance for family disputes. Provide psychological counseling services for children

The communications are forwarded to the Association during the Hotline to the Association, which in turn handles direct intervention with the children's problems in Assiut Governorate and sends reports to the National Council for Childhood and Motherhood

Classification of communications ...

During the year 2015, the society received 18 reports from ...

- 1 Behavior Modification Notification
- 1 self-help communication
- 1 violation notification
- 15 financial aid reports

Schools for Egypt

The project is one of the projects that reflects the fruitful cooperation between the Childhood Development Association and the social responsibility institutions of the private sector. The association participates in the implementation of the project in cooperation with the Sawiris Foundation for Social Development, Star Care (Mercedes Partners) and Shorouq Egypt. "Schools for Egypt" is a strong and unique opportunity to develop education in Egypt by improving its quality and increasing access to it in the rural areas of Upper Egypt, which has a direct impact on the enrollment of approximately 450 children in 15 community schools in Qena governorate. Applying the methods of catching Yassin modern and away from corporal punishment and with good infrastructure through the provision of advanced materials and educational tools and the provision of school furniture and sanitation facilities. A simplified explanation of the project framework is related to the current phase.

The first phase of the project is related to the preparatory activities of the project through the signing of the contract between the association as its executor and the partners as funded parties, as well as the opening of bank accounts, the preparation of the project headquarters, the announcement of the employees' posts, the completion of the project's functional structure, the preparation and printing of the designs for the technical and financial publications of the project and the implementation of the field survey to reach the categories The target of abandoned children and the choice of places most in need and the candidate to open schools and the examination of those sites from the official bodies to adopt and build confidence with the community and open channels of communication with the people and Ulya The children who drop out in those places proposed through the identification meetings of the project and then sign the donation agreement with the people who donate in the places nominated for opening the schools and take the necessary measures to appoint teachers in the proposed schools and train them in active learning skills.

Activities implemented

Signing of the contract ...

As part of the grant to the Association for Childhood and Development in Assiut for the establishment of schools for Egypt, the agreement was signed between the Sawiris Foundation for Social Development, Star Care Egypt and the Shorouq Egypt Association as a financier and the Childhood and Development Association in Assiut.

The jobs of the employees of the project were announced and the opening of the work was opened and the curriculum vitae was received for those wishing to apply.

Processing the project management headquarters within the assembly (separate headquarters) ...

Design and implementation of information materials, financial and technical publications for the project ...

The project is designed to include an idea about the project, its objectives, scope of work and partners, as well as production of a documentary about the project. The printing of the financial and technical publications of the project

Implementation of a field survey in a number of Qena governorate centers to select the most vulnerable villages ...

After the completion of the coordination meetings with the Directorate of Education in Qena Governorate and the identification of the four centers in which the field survey will be carried out, the consultancy task for implementing the field survey was prepared. The

objectives were to implement a field survey in the number of four centers in Qena Governorate (Abu Tesht,) To select the most needy villages and to limit children who drop out of education at the age of 7-14 years through the establishment and opening of 15 community education schools.

The field survey was carried out in three stages:

The first stage .. Office review ..

Preparation and coordination with the Childhood and Development Society: The purpose of this is to coordinate and organize the method of work in different aspects, including field survey, agreement on research tools, means of data collection, selected sample, statistical analysis, appointments, The necessary procedures such as the identification of points of contact and agreement on the dates of different interviews, as well as agreement on the form and dates of submission of various reports and methods of storage of data in addition to the ethical and professional considerations to be followed when conducting the study. Followed by a review of the available materials, where the team conducted a comprehensive review of all secondary data available with a focus on the educational component. This includes all the available reports and databases (whether from the local authorities or the Central Agency for Public Mobilization and Statistics or the partner associations or organizations and international bodies working in the same field, as well as the existing statistics, strategies and plans, whether at the local level or at the governorate level or At the national level.

The second stage .. Field work ..

Data collection stage: A team of researchers was selected to collect the data according to each tool and the data collection process was as follows:

The survey questionnaire was used to collect quantitative data on the number of schools available and schools currently operating and those in need of repair.

Focus Groups: The focus group discussion group was applied to specific groups in order to collect data on the nature of the school work, the quality of education, the best places for the new schools and the reasons, as well as the spatial space, the suitable classes for girls, the causes of the dropout and the presence of donors or not. . The members of the session were representatives of all groups and surrounding them, such as girls, mothers, fathers, teachers, community leaders and board members.

Third phase .. Analysis of data and preparation of the final report ..

Data Analysis: The research team conducted the necessary analysis of the data after the completion of the stage of collection and field review. A professional expert analyzed data using SPSS. Both types of data (quantity and how) were analyzed to achieve the desired results.

Preparation of the report: Once the statistical analysis has been completed, the research team has drafted the final report with the results and recommendations. The results were presented in a mini-workshop between the research team and the work team of the association, introducing the required amendments to the report and revising the final report based on the review and feedback.

Field visits and inspection of the candidate areas for the implementation of the project ...

The team carried out 5 field visits to follow up the field survey in order to ensure that the field study was conducted according to what is planned and presented by the mission in order to achieve the goals and results of the study and to examine the sites that are nominated by the survey team and to ensure that they conform to the specifications of the Ministry of Education. And through field visits to

Activities implemented and unplanned

- Introductory introductory meetings for the project
- Completion of preliminary inspection by the Ministry of Education for the proposed schools

in Qena

Project achievements were not planned

Permanent Donation Declarations

As the regulations and laws governing the opening of new community schools and implemented by the Ministry of Education at the present time stipulate that the duration of donation of the place for 12 years. While convincing the project team of donors to the donors agreed to make a donation permanent contribution unconditional for a certain period of time which is considered Ensure real continuity of these schools and support the people and donors to those schools.

Donation spaces ..

According to the previous item, the regulations and laws regulating the opening of new community schools, which are currently implemented by the Ministry of Education, stipulate that the proposed site for the opening of a community school with 45 meters, with two water courses. However, the donors, wishing to have the school in the best form, reached some places of donation to 114 square meters and the lowest site area of 65 square meters. The extent of the association's relations with the different external bodies as a result of the project.

- Increasing networking with the Ministry of Education in general and the General Directorate of Community Education and the second chance schools in particular
- Consolidation of the relationship with the Directorate of Education in Qena Governorate in general and with the Department of Community Education Directorate and its departments 9 in Qena Governorate.

- The Directorate of Social Solidarity in Qena Governorate defines the association and the project with facilitating the field survey.

- Coordination with the private associations in the candidate communities assisted in the field survey.

success stories

Through the field study carried out at the Abu Tesht Center, the field team moved to the communities and held mini meetings with the people and the natural leaders. This helped spread the idea of community education in the communities and raise the awareness of the people about the community education and the importance of this through the nomination of a site in Karnak village where the village Deprived of services greatly, which led to their dependence on access to services on the self-help of people and donations. As for the educational services, the presence of the primary school on the outskirts of the village, which is more than 4 kilometers from the village. To the high rate of dropout among children and to refrain from another proportion of the apprenticeship of their children from the ground and in view of the desire of parents to teach their children once the announcement of the opening of a school within the village reached a number of targets for the school to 65 children between the ages of nine to twelve of them enrolled in education and leaks as a dimension Distance to primary school and some of them did not join the final.

Challenges and difficulties encountered during the implementation of the activities of the stage

Abu Tesht Center

1. Although it is one of the most needy centers, but there is the reluctance of the people to enroll their children in schools in general and community schools in particular because there are no community schools in the center, making it difficult to understand the nature of these schools.

2. It turns out that they see the schools of community education as schools intended for poor children and not formal education schools, which gives a reflection on them that it affects the dignity of the family or family, it is best to leave their children without education on the people to consider the village Donnie look. This is reflected in the number of

community education schools in the center without any other centers, despite the presence of the target children.

3. Delays in procedures for appointment of teachers

Lessons learned

1. Raising awareness among different communities about the importance of education and the importance of the role played by the community school is one of the most important factors that help the continuity of the school within the community.
2. The necessity of using communal leadership in villages in visits and during field work because it has the greatest impact in reaching and convincing people of the idea of donating, as well as in the ease of entering these communities because these societies are due in nature to being closed communities.
3. Work to guide the community by its sense that the school of society is a property that helps to overcome the obstacles facing the functioning of the school

Our area

The project is implemented in cooperation with the Blan International Organization. The project aims at activating the roles of youth in their societies, promoting them and developing them, and providing the space for development to play more effective roles in decision-making and community development. The project targets Manfalut and Abu Tig centers in Assiut.

Manfalut Center:

- Community Development Association in Mandoura
- Society Development Society

AboTig:

Facebook  Keep me logged in Babo Tig

- Orphan Care Association in Belize

The overall objective of the project

Supporting marginalized groups to participate in decision-making at the local and national levels, including all stakeholders.

Target Groups ... Executive Associations of the Project and Government

Project results

- Community development associations and local youth groups are developed into democratic spaces that facilitate youth participation in decisions that affect their lives.
- Local government structures in targeted communities have the readiness, capacity and response mechanisms for priority issues by young people.
- Increase opportunities for networking and advocacy among local and national youth groups and contribute to raising the priority of youth issues at the national level. "

building abilities ...

Institutional Evaluation of Youth Centers ... Through Evaluation ...

- Designing an institutional evaluation tool for youth centers
- Applying the institutional evaluation tool to four youth centers.
- Analysis of forms and identify the strengths and weaknesses.
- Develop and formulate a capacity-building plan to meet these institutional needs

Training civil education .. The training was concerned with identifying participants and providing them with the skills related to the following topics:

- Rights and Responsibilities
- Participation
- Citizenship
- Youth and development and their relationship with the state

Training the rights of the child and the international conventions of community committees (Manfalut - Abteij) .. The training was interested in identifying participants and equip them with the necessary skills related to the following topics:

- Identify the types of attacks on the child
- Recognition of international conventions on the protection of children's rights
- Mechanism of communication between the community committees and technical secretariat of the sub-committees

Training the voluntary efforts .. The training is concerned with identifying participants and providing them with the necessary skills related to the following topics:

- Activating the administration of associations.
- Raising the leadership and advisory board of the importance of voluntary efforts
- To provide them with important information about volunteering, targeting, and making up for the individual and society

Round tables ...

The round tables dealt with monitoring problems that prevent young people from taking decisions that affect their lives ...

How to fit it	causes	the problem
The initiative of the government officials through a realistic experience to contain the youth and raise their situation and adopt youth proposals to improve the system of work.	The gap between generations is seen as a major reason for young people's despair about the usefulness of participation. Some, but most decision-makers and decision-makers, entrust government officials with the marginalization of young people and	Young people despair of the usefulness of participation

	their lack of discussion and discussion in their ideas for development and reform.	
After discussions, it was decided that an appropriate attendance allowance would be allocated to the time of the meeting or meeting	Due to the low economic situation, especially among young people, some are reluctant to participate in meetings, seminars and meetings - sometimes investing their time in a work that generates a sum of money	There is a material return from youth participation
Organizing camps and festivals within their villages Exploitation of activities and student groups within the universities (student families - and the care of young people) Adherence to regulations that are binding on the government in youth participation in activities and decision-making.	Non-governmental and non-governmental organizations invite young people to participate in meetings and symposia, and there is no clear mechanism for communication with them.	Lack of knowledge of youth in ways of participation and not inviting them to participate

Exchange of external experiences

A visit to exchange the experiences of the place of implementation has been carried out. The Shabab Al Sharqia Society for Development has presented a number of ideas that can be implemented by associations in Assiut, which will build the capacities of young people and activate their roles and the experiences gained from the visit and the ideas that have been put forward and can be applied in our societies. The following:

- The idea of Umrah, which depends on the mutual trust of the community
- The benefit of the Assembly of available resources and conversion to a stable source of income for the Assembly.
- Continuing research on youth attraction.
- The start of the association was one of the needs of young people.
- Selection of the Association for initiatives to address and satisfy the needs of young people.
- The idea of a water "point" initiative that indicated how to proceed with the sustainability of projects.
- The association's ideas in the initiatives were mainly aimed at attracting young people.
- Participation of the Association in a number of quality associations.
- Chairman of the Board of Directors of the Association President of the Regional Union of NGOs in Sharkia.
- Ways to attract young people with artistic activities, games, theater and drawing.
- The importance of the presence of the media inside the association.
- Partnership with private companies such as Nestlé and Bisbee.

Safer communities for children

The project is implemented in cooperation with UNICEF and is considered as a continuation of the child protection project from the harmful practices that have been implemented in Manfalut and Abutig since 2003. Work is being carried out in 6 other centers, namely Assiut, Sahel Selim, Badari, Sedfa, Qusiya, El Fath, In 76 local communities including the city - village Um - the village continued - Ezbet Onge and activate the role of natural leaders in the community through the preparation of community committees, including various disciplines that monitor children at risk and to monitor the resources available in the community and packaged and used to solve the best problems of children as they In coordination With government and non-governmental organizations to provide services to children

The overall goal.

Contribute to the development of communication methods and partnerships to abandon harmful practices against children

Project results

1. Societies oppose female circumcision and abandon harmful practices against children, including female genital mutilation and violence against children
 2. Child protection committees have been activated at the level of Assiut Governorate
- Work strategies.

- The formation of trained cadres familiar with the rights of the child and renounce violence against children
- Create cadres capable of monitoring children at risk and resources available to society and categorize them to solve children's problems
- Partnership and networking with governmental and non-governmental organizations
- Capacity building for the working group, board of directors, youth and media professionals
- Raising awareness of marginalized groups in targeted villages

Target group

Direct Beneficiaries ...

- Children at risk.
- Young .
- The clergy.
- the doctors .
- Social workers in schools.
- social workers in social affairs.
- members of community child protection committees.

Positive Models

- Local natural leaders.

The project activities

total	Participants		Total number of participants	Activity
	female	male		
18413	15592	2821	316	Seminars
146316	95038	54278	64609	Home visits
99947	79600	20347	6491	Awareness sessions
22250	15226	7024	201	Puppet theater
346	326	20	224	Positive Model Meetings
257	233	24	8	Experiences exchange meetings for positive models
459	310	149	302	Meetings of community committees
182	47	135	1	Complex meeting of child protection committees
131	110	21	4	Round tables with health workers
410	156	254	2	World Day Celebration
	114	46	8	Peer education workshops (y-peer)

Capacity building activities

- 6 training programs for positive models, involving 158 individuals, 14 males and 144 females
- 9 training programs for child protection committees with 223 participants, 113 males and 110 females
- 2. A personal skills training program for the project team

Achievements

- Implementation of 62 awareness seminars in the health units in the targeted villages and 123 awareness meeting after coordination with the Directorate of Health in Assiut where implemented by the health team within those units
- 155 children receive a social security pension
- The transfer of 75 children to Emad Abdel Nabi Foundation for in-kind and cash assistance
- Transferring 34 children to health units for deworming
- Donation of the best players to buy 2 potogas, 6 sets of bride, 2 kiosks, 50 food cartons, 80 children's clothes for poor families, 1500 pounds for the demolition of their house
- Coordination of the Association of the development of the rural family in the landfill

with the Association of the work of a workshop for clothes in the village of Khawalid
- Organizing a medical convoy and distributing necessary treatment in the village of Al-Khawwal

- The transfer of 3 cases for eye operations in coordination with Al-Azhar Hospital.
- Providing 265 cartons of food and 44 families on meat in coordination with the Orman and Food Bank.

- Free treatment of 14 children through pharmacies.

- The detection of 115 children through medical convoys organized with the Orman Association and the treatment was provided free of charge.

- Cochlear implantation of a child in cooperation between the Child Rescue Line, Orman Association, Resala Association and the Kurdish Association for Social Services and Community Development.

2 cash dispensers and a wheelchair for 3 children with health problems.

- 223 families have a security pension with economic problems.

- Provide 45 glasses for children with visual impairment, which affects the extent of their academic achievement.

- Conversion of 99 children to health units for deworming.

- Payment of school expenses to 150 students in coordination with social affairs and provided school supplies to 77 students of good people.

Difficulties

- Target groups should not attend community activities during the holidays

- The refusal of older persons to believe in the harm of FGM / C and the reluctance of some of them to attend awareness-raising activities, bearing in mind that a few of them have little decision on FGM.

- The number of young males attending community activities is still low compared with women. This is due to their travel to other governorates during the summer in search of work or feeling embarrassed to hear about female circumcision or their indifference to the subject and that it is due to the mother from their point of view.

- Many families fear signing up to abandon FGM / C and see that their announcement is very good and one of the rural women has been insulted and insulted.

- Some husbands refused to leave their wives to attend group activities.

- Taking preschool children into activities negatively affects the concentration and absorption of the attendees from the education provided.

- Working in areas where there are rebates.

- Some women refused the team to take photographs of the documentation of their belief in the spread of social networking sites.

- Some staff members were ridiculed when carrying out FGM activities.

- Few urban villages are difficult for rural leaders to carry out house visits or awareness-raising activities in the morning.

Lessons learned

- The dissemination of messages by doctors and health leaders to the health units.

- Discuss directly thorny issues such as female genital mutilation and harassment and carry out their own activities that reflect the importance of these subjects and convey to the participants that they are issues that must be raised and not kept silent even if the staff is addressed.

- Families who have been persuaded to abandon female genital mutilation have the greatest impact on families and the family is not convinced so some of them are used in home visits and mini-meetings to recount their experience with female

circumcision and how to take their decision and the most influential messages, which made them take another direction and is Against female circumcision.

- Extensive activities that are implemented with children such as meetings on positive values and behavior modification, which helped many of them correct wrong behaviors in dealing with others, both within the family or outside with peers in times of play, for example.

- Coordinate with other civil society organizations within communities and provide messages on various educational topics that facilitate access to targeted families and contribute to reaching more families.

- Coordinate with governmental and non-governmental bodies to assist in the implementation of project activities and solve the problems of children such as health units, schools and civil society organizations.

- Meetings of exchanging experiences between the child protection committees at the village level and the center in the presence of the director of the information center in the General Office of Assiut governorate to discuss the difficulties and list the successful models.

- Coordinating with the Directorate of Awqaf in building the capacity of the Islamic clerics in the field of female genital mutilation to reach the conviction of some of them or hesitation.

- Increasing the number of positive models whose capacity has been built in the area of female circumcision helps to increase the number of those who are convinced to abandon this practice.

The Egyptian Forum for Civil Society Organizations project

The Egyptian Civil Society Organizations (CSO) project works to create a supportive environment for the work of NGOs and to foster a culture of dialogue between them and other organizations in the community, building their capacity and developing their institutional structure to enable them to perform their roles efficiently and effectively.

The project is implemented in collaboration with the Blan International Foundation and works through 10 local associations in communities

4 Associations in the center of Apoteg ..

(Dakar Community Development Society - Tawasir Bahajar Dakran Association - Orphan Care Association in Belayzah - Association of the Human Message in Abutij) Manfalut Center Associations

(Association of Community Development in Mandandra - Community Development Association in Banha Rafea - Al-Rashed Association in Banha Rafea - Society for the Preservation of the Holy Quran in Jhaddam -

West Assiut Society

(Association of Community Development of Arab Tanneries)

The overall objective of the project.

The establishment of the Egyptian Forum for Civil Society Organizations in Upper Egypt as a meeting point between government agencies, Egyptian civil society organizations and local voluntary organizations for dialogue and an opportunity to exchange information and promote a supportive institutional environment.

Sub-goals

- Strengthen the capacity of the Blan, Sohag and Assiut working groups and the work of two partner associations to create a supportive environment, reduce conflict, institutional development, leadership and effective communication.

- Improve the institutional capacity and effectiveness of 16 civil society organizations by the end of 2017 to manage their interventions to reach as many marginalized groups as possible
- Establishment of the Institutional Development Forum by the end of 2017 to implement three annual forums organized by Blanc in collaboration with partner associations within 3 years
- Establishment of an information system and databases run by youth specialists / volunteers in the field of information technology within 14 grassroots associations at the end of the project

the expected results

- Raise the capacity of the Blanc team within two units and partner programs to facilitate institutional development and CSO forums
- Improve the institutional capacity of 14 civil society associations at the end of the project and be able to manage their interventions and programs to reach as many marginalized groups as possible
- Establishment of the Forum for Institutional Development. Three forums were implemented annually through Plan in cooperation with partner associations by the end of 2017
- Establishment of an information system and databases managed by young ICT specialists / volunteers for development within 14 grassroots associations at the end of the project
- Training materials for institutional building and distribution to other organizations and associations

Project activities

Two coordination meetings were held with the Blan International ...

The meeting aimed to discuss the channels of communication and preliminary procedures for the project and ways of coordination between the staff of the Blan International and the two umbrella organizations, explaining the policy manual and procedures of the project and discuss the difficulties encountered by the two societies at the beginning of the project and ways to overcome them. The second meeting was aimed at coordination for the second quarter of the project and Presentation of what was accomplished during the first quarter and discussing the future plan.

Exchange of experiences

The implementation of the number of visits to exchange experiences and their goal to define the experience of networking with the associations in Aswan and how the performance of work and the importance of networking in the conduct of their performance and how to improve the results through the experience of networking and the definition of participants experience the Arab network of social issues as one of the leading networks in their experience and how to apply the experience In communities.

Implementation of technical support visits to associations aimed at developing the performance of associations in the processes of documentation, how to write the report,

documentation and confirmation ...

The working group held a coordination meeting with local community liaison officials. The meeting discussed the extension of the agreement between the local associations and the Childhood and Development Society

The working group participated in two meetings to prepare for the Egyptian Forum, where the meetings dealt with the development of the vision of the forum and agreement on the issue of the Forum and identify the committees organizing the forum and agree on the procedures for its implementation

Capacity building of IT centers ...

A coordination meeting was held with the officials of IT centers to present the base of the plan's interventions and training on how to enter the data and follow up the work in the associations and to discuss the tasks related to the work of the centers' officials within their associations and an explanation of the required databases.

Technical support visits to IT centers

During the period of the report, the ITC official visited IT centers to follow up the training of volunteers and provide technical support from the field to the local associations while dealing directly with the databases and solving the emergency problems and how to work on developing the performance of the centers within the targeted associations.

The Egyptian Forum for Civil Society Organizations

The second forum dealt with the right of children and young people to participate in development and addressed the three axes of the youth axis and discussed the problems facing them in society and urged them on the importance of community participation and the importance of their role in solving problems and reviewing some of the successful experiences in this area which are hampered by the development of their capacities and the capacities of social participation and finding ways to solve these problems and the focus of civil society organizations and governments and discussed their vision of the problems of youth and children and how to intervene to solve these problems

Micro finance

Unemployment is one of the most important challenges faced by the society, where about 70% of unemployed youth suffer from unemployment. This problem is due to the phenomenon of lack of employment. This problem is manifested in rural communities where employment is very low, but it is increasing in agriculture. To a muscle effort, which leads to the reluctance of young people to work in addition to the lack of rural society to excel in a certain craft prevail in society

Despite the ability of rural women to take responsibility for and manage a small income-generating project as well as the ability to take responsibility for their own care and upbringing of children and others, rural women often lack access to adequate funding sources to fund their activities for socio-economic reasons. The lack of sufficient guarantees for the poor woman is accepted by the bank as collateral for the loan that the woman wants to obtain. This problem results in the existence of idle productive capacities within the community, which can contribute in the event of its operation, at least to reduce the problems of poverty in these communities. Therefore, the important role that can be played by NGOs with close ties to their communities enables them to provide direct financial services to individuals and Create job opportunities for young graduates and rural women and develop their skills to begin implementing microenterprises.

Geographic range

Villages and centers of Assiut Governorate

Projects

New Horizons Project

- Soft loans project by Prof. Dr. Galal El Din Zaki Said

Sources of funding

- For the project of new horizons: self-financing from the association

- Soft loans project: donation from Dr. Jalaluddin Zaki Said

Target groups

- Graduates, rural women with dependents and marginalized groups represent the borrowers of the project.

- Families of borrowers.

- Employers of micro entrepreneurs.

- Members of the community in the environment surrounding the implementing society,

which can benefit from the financing and non-financing services provided by them continuously.

Functional structure

Lending Service

The Association provides lending services to all groups of society in order to raise the economic level of the most needy groups and to develop the villages in Assiut governorate provided that the following conditions are met:

- The applicant must be an Egyptian national
- The applicant must be at least 21 years of age and no more than 60 years of age
- Be fully qualified and carry a valid national ID card and valid
- To be a target group to grant funding from low-income or divorced women and widows and dependents or farmers or youth graduates or those with special needs
- The place of residence of the borrower in the same place of the project or within the geographical scope of the work of the association
- The place of the project in the geographical scope of the work of the project
- The purpose of obtaining funding is to start a new project or an existing financing
- The existing project has a fixed place
- The loan repayment period shall not exceed 18 months

Equity capital

- The capital of the project of new horizons until 2015 amounted to 1.2560.000 pounds

- The capital of soft loan project until 2015 reached LE 560,000

Loan size

- The disbursement of loans starting from 1000 pounds to 20,000 pounds at a rate of 15%

Indicators

- Building confidence and flexibility in dealing between the association and the customer and customer development over time by giving him a higher slice when the recurrence of borrowing to increase the size of beneficiaries in 2015 by 1527 customers.

- Commercial loans had the largest share in terms of issuance, due to the low risk, which is the process of selling, buying, distributing a commodity and reinvesting the profit, while the production loans were less in the issue due to the problems of obtaining the raw materials and the appropriate primary, which leads to a lower level of quality and monopoly of intermediaries.

- The wholesalers and the imposition of goods loaded at the time of purchase, as well as the low level of services and facilities available to this sector and the inability to attract trained and qualified workers and low technical level, which leads to the difficulty of reaching a reasonable level of competition and service loans are low-risk and do not need a workforce The number of projects in terms of activity was 1449, including 1238 commercial loans, 369 service loans and 42 production loans.

- Increasing the turnout rate for male and female loans due to women's fear of assuming responsibility in case of non-payment. Also, it is difficult to reach the guarantor easily. On the other hand, women often prefer livestock breeding projects which do not fall within the plan of lending projects. We find that the lending rate for the female category is 384 loans and 1265 males.

Achievements

- Obtain a license to practice activity from the Financial Supervisory Authority.

- Increasing the size of the portfolio from LE 10 million in 2014 to LE 12.5 million in 2015

- Increase the number of active customers from 2,300 in 2014 to 2,550 in 2015

- The repayment rate for the year 2015 was 99.4%

- A financial policy was put in place at the end of 2015 aiming to eliminate the negative impact of the project during the previous years.

Difficulties

- Insufficient capital to meet customer needs of loans
